

O3 Chemicals

Discover a South African Airconditioning Industry FIRST!

Introducing the O3 Chemicals Intelligent Resource Management System
for Property Owners and Facilities Managers

o3chemicals.co.za

Meet O3 Chemicals – Your GREEN Air Conditioner Service and Cleaning Solutions Partner

O3 Chemicals is a leading South African manufacturer and supplier of premium coil and refrigeration cleaners to the Aircon and Refrigeration maintenance industry.

Our company which is at the forefront of the GOING GREEN campaign, plays a pivotal role in using our many resources to help Property Owners, Facilities Managers, and Contractors everywhere to achieve GREEN status in their own environmental awareness effort.

More Than Just Chemicals – O3 Brings You Real-time Information on All Your Projects

To effectively deliver our range of powerful and non-corrosive air conditioner cleaning products, we have also developed and launched our **Intelligent Resource Management Program**, utilising the latest data collection and sharing technology.

O3 Chemicals combines a Premium Product with a client-customizable Management System.

Give Your Facilities Manager Complete Control over Time and Budget

- ✓ This bespoke project management programme gives your Facilities Manager a complete over-view of all properties, work teams and accounting – in one comprehensive package, on a per site / per job basis.
- ✓ This Resource Management Program provides a seamless real-time information flow from the worker at the job site to the Facilities Managers desk.
- ✓ Your Facilities Manager can monitor whether the correct quantities of chemicals are being purchased to meet the requirements of any cleaning project.

Benefits of the O3 Intelligent Resource Management System

- ✓ **Built-in checks and balances** to measure the effectiveness of every facet of the coil cleaning programme.
- ✓ **The management and control** of maintenance programmes that are essential for any company to maintain profit margins.
- ✓ **Workable solutions** based on the success that O3 Chemicals has achieved over many years dealing with these problems in companies large and small.

Saving Money by Saving Water, Time and Energy

- ✓ O3 Chemicals has successfully introduced waterless coil-cleaning programmes throughout South Africa - cleaning of Air Handling Units, refrigeration units, chillers as well as HVACs/Split Units, consols, cassettes and condensers, including restoring barrel fans to mint condition (without removing them) – **WITHOUT the use of water.**

- ✓ **The O3 methodology halves cleaning times, reduces chemical costs by 60% and eliminates water consumption.**

O3 Chemicals - Extensively Tested, Used and Trusted

- ✓ Besides offices, and shopping malls, where our cleaning products are applied during normal trading or business hours, O3 products are used in hospitals without affecting patients' welfare.
- ✓ Our products have also been tested in mines, petrol refineries, on oil rigs, in airports and conference centers whilst in operation
- ✓ **O3 Chemicals' performance is nothing less than stellar.**

Have an Insight Into Your Business with O3 Chemicals

This proprietary O3 Chemicals Intelligent Resource Management System has been designed and developed by us to provide you with real-time information on all the jobs occurring on your properties, at all times.

From here your Facilities Manager can monitor staff, material resources, time management and make costing adjustments where needed, directly on the O3 Management Platform, and can do this **from anywhere in the world**.

No other air conditioning Chemical Brand can match this.
